DETAILED ACTION

1. Claims 1 - 12 are pending in the application.

2. Formal drawings submitted on 02/21/2006 and 06/22/2001 have been accepted by the examiner.

INTERVIEW SUMMARY

3. On May 10, 2006, examiner contacted applicant's representative, Mr. Justin Liu, and noted that the claims are allowable over the art of record; however, claim 12 (line 5) recites the limitation "the second device" which lacks antecedent basis. Applicant authorizes examiner to amend the limitation to recite "a second device" in an examiner's amendment.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Justin Liu (Reg. No. 51,959) on May 10, 2006.

The application has been amended as follows:

a. Claim 12, line 5, replace "in the second device" with -- in a second device --.

REASONS FOR ALLOWANCE

5. The following is an examiner's statement of reasons for allowance:

Application/Control Number: 09/888,096

Art Unit: 2194

The prior art does not expressly teach or render obvious the invention as recited in independent claims 1, 8 and 12.

The prior art teaches an host device with a configurable hardware interface that includes a programmable logic device [col. 4, line 16 – col. 5, line 17 of Chang] and storage for storing bitstreams that configures the first configurable hardware interface to implement a driver [col. 6, lines 21 – 46 of Chang] and a peripheral device [col. 4, lines 16 – 32 of Chang] with a configurable hardware interface [col. 5, lines 18 – 30 of Chang] and a programmable logic device [col. 5, lines 18 – 29 of Chang]. However, the prior art does not teach that both the host and peripheral devices having pluralities of bitstreams available for configuring the programmable logic devices. Further, the prior art does not teach checking whether the host device have the bitstream that corresponds to a driver for the peripheral device, configuring the programmable logic device of the host device if the bitstream is found, otherwise, directing the host device to request a bitstream from the peripheral device and retrieving the bitstream from the peripheral device.

In addition, the prior art of record does not provide a basis of evidence for asserting a motivation that one of ordinary skill level in the art at the time the invention was made would have integrated or modified the configurable hardware interfaces of the host and peripheral devices to both include bitstreams for configuring the programmable logic devices to result in a configurable hardware interface as recited in the context of the independent claims.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Application/Control Number: 09/888,096

Art Unit: 2194

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
